

# *insight*<sup>®</sup> 6.0 + LUNA Quick Start

## **Before getting started you will need the following:**

The *insight*<sup>®</sup> CD

A preinstalled database (MSSQL, Oracle, MySQL) on the target computer

Administrative privileges on the target Windows, Solaris or Linux computer

## **Getting Started:**

On the *insight* CD open the **INSTALLCONFIG\_60.PDF** located in the documentation folder.

Review the *insight*<sup>®</sup> components diagram and definitions starting on **page 11**.

The Insight server components installation instructions begin on **page 20**.

The LUNA server components installation instructions begin on **page 50**.

## **Licensing the Server Components:**

The *insight*<sup>®</sup> server components require a license in order to operate. This license is bound to the host server and needs to be generated and installed before you can make use of the *insight*<sup>®</sup> server software.

During the installation of the server components, you will be prompted to register. Registration will trigger an email request to [licensing@luna-img.com](mailto:licensing@luna-img.com) and a confirmation email to the email address you registered with. If you do not receive this email, please contact [licensing@luna-img.com](mailto:licensing@luna-img.com) or call 800-452-LUNA (5862).
