

insight® 6.3 Quick Start Guide

Before Getting Started you Will Need the Following:

- The **Insight®** DVD or download software from:
<http://software.lunaimaging.com/software/6.3/>
- A preinstalled database (MSSQL, Oracle or MySQL).
- Administrative privileges on the target Windows, Solaris or Linux computer.

Getting Started:

1. On the **Insight®** DVD open the InstallConfig_63.pdf located in the CD 1 documentation folder.
2. Review the **Insight®** components diagram and definitions starting on **page 11**.
3. The server components installation instructions begin on **page 19**.

Licensing the Server Components:

The **Insight®** server components require a license in order to operate. This license is bound to the host server and needs to be generated and installed before you can make use of the **Insight®** server software.

During the installation of the server components, you will be prompted to register. Registration will trigger an email request to licensing@lunaimaging.com and a confirmation email to the email address you registered with. If you do not receive this email, please contact licensing@lunaimaging.com or call 800-452-LUNA (5862).

If you would prefer to pre-register, please contact licensing@lunaimaging.com or 800-452-LUNA (5862) and ask for Support. By pre-registering, you will be able to make use of the **Insight®** software as soon as you install it.
